

# DIFFERENTIAL SHAFTS

## (DS - 4500)

Differential Shaft is basically a rewinder shaft of slitting machine which can give consistent winding tension irrespective of film width.

Differential Shafts are designed to provide the better degree of control to ensure multiple core gripping so that applications are performed correctly.

The rewind reels can be easily removed by a small rotation on rewinding direction.

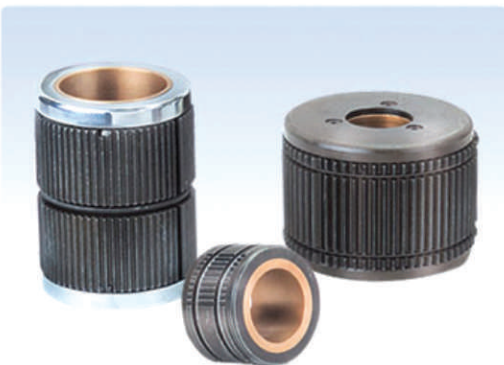

### Advantages

- Reduces job set up time.
- No need to open shaft inserting spacers as per coil width.
- It gives uniform tension even of a higher speed irrespective of Film width.
- Loading & Unloading time is very less.
- Avoid core dust.

### TECHNICAL SPECIFICATIONS

Body	: Alloy Steel (Hard Chromium Plated)
Cam Lock Materials	: Stainless Steel
Available Sizes	: 3" (76mm) & 6" (152mm)
Length	: Upto 3 meters
Air Pressure	: 0 to 6 Bar
Warranty	: 12 months for any manufacturing defects
Uses	: Multiple slit on one time such as PET, CPP, OPP, PE, PS, PVC, FILM, FOIL etc.

MECHANICAL QUICK LOCKS

BALL TYPE QUICK LOCKS
